Handbook on Volunteers in Army Community Service Stanley Levin 1969 As guidance to those in charge of Army Community Service centers on military posts and to other personnel concerned with social services, the handbook offers comprehensive information on developing and administering a volunteer program for Army Community Service. The handbook stresses the encouragement of innovation, flexibility, and individual initiative both in personnel and in programs. Since ACS centers differ in many ways, the handbook discussed general guidelines and suggestions rather than detailed specifications, in order that the information can be adapted and interpreted according to local circumstances. Among the topics covered are recruiting volunteers, interviewing, preparing job descriptions and facilities, supervision, and training design.

Political Groups, Parties, and Organizations that Shaped America: An Encyclopedia and Document Collection [3 volumes] Scott H. Ainsworth Ph.D. 2019-07-19 This three-volume set explores the multiple roles that parties and interest groups have played in American politics from the nation's beginnings to the present. • Provides expert analysis of the emergence and effect of parties and interest groups on the American political system • Offers a broader and more complete understanding of both parties and interest groups in American politics than has been offered previously • Helps readers to move beyond an event-driven knowledge of parties and interest groups to explore the systematic and structural bases for interest group and party behavior • Includes primary source documents that allow readers to discover for themselves the means by which groups or parties place items on the public agenda and thereby come to (or sometimes fail to) shape our governmental system

Guide to Information Sources in Engineering Charles R. Lord 2000 The only source that focuses exclusively on engineering and technology, this important guide maps the dynamic and changing field of information sources published for engineers in recent years. Lord highlights basic perspectives, access tools, and English-language resources--directories, encyclopedias, yearbooks, dictionaries, databases, indexes, libraries, buyer's guides, Internet resources, and more. Substantial emphasis is placed on digital resources. The author also discusses how engineers and scientists use information, the culture and generation of scientific information, different types of engineering information, and the tools and resources you need to locate and access that material. Other sections describe regulations, standards and specifications, government resources, professional and trade associations, and education and career resources. Engineers, scientists, librarians, and other information professionals working with engineering and technology information will welcome this research

Invisible Child Andrea Elliott 2021-10-05 PULITZER PRIZE WINNER • A "vivid and devastating" (The New York Times) portrait of an indomitable girl—from acclaimed journalist Andrea Elliott "From its first indelible pages to its rich and startling conclusion, *Invisible Child* had me, by turns, stricken, inspired, outraged, illuminated, in tears, and hungering for reimmersion in its Dickensian depths."—Ayad Akhtar, author of *Homeland Elegies* ONE OF THE TEN BEST BOOKS OF THE YEAR: The New York Times • ONE OF THE BEST BOOKS OF THE YEAR: The Atlantic, The New York Times Book Review, Time, NPR, Library Journal In *Invisible Child*, Pulitzer Prize winner Andrea Elliott follows eight dramatic years in

the life of Dasani, a girl whose imagination is as soaring as the skyscrapers near her Brooklyn shelter. In this sweeping narrative, Elliott weaves the story of Dasani's childhood with the history of her ancestors, tracing their passage from slavery to the Great Migration north. As Dasani comes of age, New York City's homeless crisis has exploded, deepening the chasm between rich and poor. She must guide her siblings through a world riddled by hunger, violence, racism, drug addiction, and the threat of foster care. Out on the street, Dasani becomes a fierce fighter "to protect those who I love." When she finally escapes city life to enroll in a boarding school, she faces an impossible question: What if leaving poverty means abandoning your family, and yourself? A work of luminous and riveting prose, Elliott's *Invisible Child* reads like a page-turning novel. It is an astonishing story about the power of resilience, the importance of family and the cost of inequality—told through the crucible of one remarkable girl. Winner of the J. Anthony Lukas Book Prize • Finalist for the Bernstein Award and the PEN/John Kenneth Galbraith Award A Field Guide for Science Writers Deborah Blum 2006 This guide offers practical tips on science writing - from investigative reporting to pitching ideas to magazine editors. Some of the best known science writers in the US share their hard earned knowledge on how they do their job.

Common Enemies Rachel Kahn Best 2019-07-01 For over a hundred years, millions of Americans have joined together to fight a common enemy by campaigning against diseases. In *Common Enemies*, Rachel Kahn Best asks why disease campaigns have dominated a century of American philanthropy and health policy and how the fixation on diseases shapes efforts to improve lives. Combining quantitative and qualitative analyses in an unprecedented history of disease politics, Best shows that to achieve consensus, disease campaigns tend to neglect stigmatized diseases and avoid controversial goals. But despite their limitations, disease campaigns do not crowd out efforts to solve other problems. Instead, they teach Americans to give and volunteer and build up public health infrastructure, bringing us together to solve problems and improve our lives.

The Future of Federal Household Surveys National Research Council 2011-08-21 Federal household surveys today face several significant challenges including: increasing costs of data collection, declining response rates, perceptions of increasing response burden, inadequate timeliness of estimates, discrepant estimates of key indicators, inefficient and considerable duplication of some survey content, and instances of gaps in needed research and analysis. The Workshop on the Future of Federal Household Surveys, held at the request of the U.S. Census Bureau, was designed to address the increasing concern among many members of the federal statistical system that federal household data collections in their current form are unsustainable. The workshop brought together leaders in the statistical community to discuss opportunities for enhancing the relevance, quality, and cost-effectiveness of household surveys sponsored by the federal statistical system. The Future of Federal Household Surveys is a factual summary of the presentations and related discussions that transpired during the workshop. This summary includes a number of solutions that range from methodological approaches, such as the use of administrative data, to emphasis on interagency cooperative efforts.

Author's Handbook of Styles for Life Science Journals Michel Atlas 1995-11-08 Let the Author's Handbook of Styles for Life Science Journals save you time and trouble by providing a one-stop resource for all your manuscript writing requirements. No more plowing through your journal collection or wandering the library stacks to get those elusive journal pages containing instructions to authors. This unique book contains all the information you need to know: whether the journal will consider your manuscript; the journal's submission address; how to construct the abstract, illustrations, tables, and references; and specific information on copyright, multiple authorship, statistical analyses, and page charges. The Author's Handbook of Styles for Life Science Journals gives all this information for 440 of the most important English-language, life science journals. Titles were selected from the "Journal Rankings by Times Cited" list in the Science Citation Index Journal Citation Report. Because this report is heavily weighted toward the medical sciences, other life science journals are incorporated into the book based on general level of prestige and reputation. In addition, some new titles that promise to be important to their fields, like Nature Medicine and Emerging Infectious Diseases are also included. Organized by journal title, the handbook's entries are uniformly arranged to allow direct comparison between journals. Information is presented in an easy-to-use, easy-to-read format with clear and explicitly stated instructions. The Author's Handbook of Styles for Life Science Journals gives authors in the life sciences all the information necessary for the correct and complete compilation of a manuscript for submission to their journal of choice.

Street Talk Randy Kearse 2006 In a controversial and unique study of lexicon, Mo Betta does what Merriam-Webster did for the English language; he has scrupulously compiled an authentic, comprehensive array of urban terms. Street Talk serves as the main reference guide for the Hip-Hop and Urban slang language. By collecting and combining all the various elements that influence, contribute to, and at times dictate the pulse of Hip Hop and urban "street" culture. Street Talk grew into one of the most comprehensive slang dictionaries ever written. Street Talk is, without a doubt, the most authentic Hip-Hop and urban slang dictionary to date. Despite the exclusion of derogatory terms for women, race, sexual preference, ethnicity, and religion, the book is by no means watered down or softened. The terms defined can be found everywhere in urban culture, including songs by today's most popular rappers. Drawing on his own authentic street knowledge and that of his peers, Mo Betta offers alluring insights into Hip-Hop and urban culture.

What Editors Want Philippa J. Benson 2012-12-07 Research publications have always been key to building a successful career in science, yet little if any formal guidance is offered to young scientists on how to get research papers peer reviewed, accepted, and published by leading scientific journals. With What Editors Want, Philippa J. Benson and Susan C. Silver, two well-respected editors from the science publishing community, remedy that situation with a clear, straightforward guide that will be of use to all scientists. Benson and Silver instruct readers on how to identify the journals that are most likely to publish a given paper, how to write an effective cover letter, how to avoid common pitfalls of the submission process, and how to effectively navigate the all-important peer review process, including dealing with revisions and rejection. With supplemental advice from more than a dozen experts, this book will equip scientists with the knowledge they need to usher their papers through publication.
