Variation in the Caribbean Lars Hinrichs 2011-01-26 The study of linguistic variation in the Caribbean has been central to the emergence of Pidgin and Creole Linguistics as an academic field. It has yielded influential theory, such as the (post-)creole continuum or the 'Acts of Identity' models, that has shaped sociolinguistics far beyond creole settings. This volume collects current work in the field and focuses on methodological and theoretical innovations that continue, expand, and update the dialog between Caribbean variation studies and general sociolinguistics.

Wait No More Benjamin Roseth 2018-06-06 This book is about the smallest unit of public policy: the government transaction. Government transactions—requesting a birth certificate, registering a property, or opening a business, for example—are the way that citizens and companies connect with the government. Efficient transactions enhance the business climate, citizen perception of government, and access to crucial public programs and services. In Latin America and the Caribbean, however, government transactions are often headaches. Public institutions rarely coordinate with each other, still rely on paper, and are more concerned about fulfilling bureaucratic requirements than meeting citizens' needs. Wait No More empirically confirms a reality known anecdotally but previously unquantified and offers a path to escape the bureaucratic maze.

Native on the Net Kyra Landzelius 2004-11-01 Exploring the influence of the Internet on the lives of indigenous and diasporic peoples, Kyra Landzelius leads a team of expert anthropologists and ethnographers who go on-site and on-line to explore how a diverse range of indigenous and transnational diasporic communities actually use the Internet. From the Taino Indians of the Caribbean, the U'wa of the Amazon rainforest, and the Tunomans and Assyrians of Iraq, to the Tingas and Zapatistas, Native on the Net is a lively and intriguing exploration of how new technologies have enabled these previously isolated peoples to reach new levels of communication and community: creating new communities online, confronting global corporations, or even challenging their own native traditions. Featuring case studies ranging from the Arctic to the Australian outback, this book addresses important recurrent themes, such as the relationship between identity and place, community, traditional cultures and the nature of the 'indigenous'. Native on the Net is a unique contribution to our knowledge of the impact of new global communication technologies on those who have

traditionally been geographically, politically and economically marginalised.

Internet and Society in Latin America and the Caribbean International Development Research Centre (Canada) 2004 This book presents pioneering research that is designed to show, from a qualitative and ethnographic perspective, how new information and communication technologies, as applied to the school system and to local governance initiatives, merely reproduce traditional pedagogical approaches and the dominant forms by which power is exercised at the local level. The studies thus constitute points of departure for further thinking about the need to promote an Internet culture based on the social application of a OC right to communication and cultureOCO and an OC Internet right, OCO that will permit the establishment of true citizen participation and free access to knowledge, with due regard to personal and individual rights such as those of privacy and intimacy."

Commonwealth Caribbean Business Law Rajendra Ramlogan 2012-05-23 Caribbean Business Law breaks away from the traditional English approach of treating business law primarily as the law of contract and agency. It provides a broad overview of the foundation of various legal systems and goes on to examine the various areas of legal liability that may impact on business activities. These areas include tort law, criminal law, internet law and payment in business transactions. Specifically, the book targets the development of business law in several Commonwealth jurisdictions, including Canada and Australia, but with special focus on legal developments in Commonwealth Caribbean countries. The approach of the book is to present excerpts from judgments, so as to enable students to understand legal principles as espoused by the judiciary without the filtering bias of authors. This new title is essential reading for students taking LLB and Business Degree courses in the Caribbean and other Commonwealth jurisdictions.

Raising the Bar for Productive Cities in Latin America and the Caribbean María Marta Ferreyra 2018-06-07 With more than 70 percent of its population living in cities, Latin America and the Caribbean (LAC) is among the most urbanized regions in the world. Yet, although its cities are, on average, more productive than those elsewhere in the world, their productivity lags that of North American and Western European cities. Closing this gap provides LAC with the opportunity to raise living standards and join the ranks of the world's richest countries. Raising the Bar: Cities and Productivity in Latin America and the Caribbean is about the productivity of cities in LAC and the factors that help to explain its determination. Based on original empirical research, the report documents the high levels of population density and other features of LAC cities that mark them out from those in the rest of the world. The report also studies the role of three key factors †“ urban form, skills, and access to markets †“ in determining the productivity of LAC cities. It shows that while excessive congestion forces and inadequate metropolitan coordination seem to be stifling the benefits of agglomeration, LAC cities benefit from strong human capital externalities. It also finds that, within individual LAC countries, cities are poorly integrated with one another, which contributes to large differences in performance across cities and undermines their aggregate contribution to productivity at the national level.

Sharing Knowledge Making a Difference World Association for Sustainable Development. International Conference 2011 Information communications technologies (ICTs) are generally viewed as the new vehicle to redress developmental problems. The book assesses the value of such claims by analyzing the structure and workings of the global political economy (GPE) and its impact on, and prospects for developing countries in the current techno-economic context. The book uses a case study of the Caribbean to illustrate the challenges and opportunities faced by small-island developing states (SIDS) in the new techno-economic paradigm. The question must be asked, can small island developing states such as those of the Caribbean leverage modern ICTs for growth and development against the backdrop of a yawning global digital divide? Hence, the book addresses the central problem of the digital divide and whether emerging ICTs offer any real economic opportunities for the Caribbean region.

Animal farm George Orwell 2013-05-16 De dieren op een boerderij komen in opstand tegen hun meester de mens en nemen zelf de macht in handen. De varkens, die lang tevoren in het geheim hebben leren lezen en schrijven, werpen zich op als de natuurlijke leiders van de revolutie. Zij staan immers op een hoger intellectueel peil dan de andere dieren. Ze breiden hun voorrechten steeds verder uit en vormen een nieuwe elite, even oppermachtig als de oude heersers. De catastrofale ineenstorting van deze gemeenschap kan ten slotte niet uitblijven. Animal Farm, geschreven in 1943, is een klassiek geworden satire op een totalitaire staat en samenleving, die vandaag de dag nog niets aan zeggingskracht heeft verloren.

Race Rights Reparations Fernne Brennan 2017-07-14 This book considers institutional racism as a problem that exists within modern societies. Its roots lie with the transatlantic slave trade and slavery and the solution involves ridding society of the problem. It is argued here that, first, there needs to be an acceptance of its existence, then developing the tools needed to deal with it and, finally, to implement those tools so that institutional racism can be permanently removed from society. The book has four themes: the first considers the nature of institutional racism, the second theme looks at instances of institutional racism through matters such as

deaths in custody and skin lightening, the third considers the concept of reparations and the final area looks at the development of social movements as a way of pushing institutional racism up the political agenda. The development of a social movement is part of a social discourse which would, for example, push mentoring as a form of reparations. There is a need for more research on the manifestations of institutional racism and this book is part of that discourse. It is argued that the legacy of the slave trade and slavery is continuing and contemporary through the presence of institutional racism in society. This problem has not been addressed through legislation and policies devised to combat racial discrimination. Institutional racism needs to be understood as being located in the processes and procedures of societal institutions.
