War and the Ivory Tower David L. Schalk 1991 How do intellectuals respond to war and social upheaval? When do they remain cloistered in the ivory tower, and when do they engage themselves in political

activism? In this forcefully argued study, David L. Schalk compares American responses to the Vietnam War with French responses to the Algerian War, finding many striking similarities in the way intellectuals voiced their outrage at the policies of their governments. Schalk, whose previous book on French political engagement was nominated for the Pulitzer Prize, argues that in both France and the United States political activism by intellectuals passed through similar cycles of engagement. Early American and French responses to the wars included teach-ins, persuasive, often scholarly writings, and petitions. When logical persuasion failed to influence government policy, moral outrage succeeded this pedagogic stage, and intellectuals warned the people of these two countries in essays and open letters that the ethical ideals of their societies were at risk. When these two forms of protest proved ineffectual, many intellectuals began to call for counter-legal actions--like draft or tax resistance, and civil disobedience--which could, and often did, lead to arrest. After establishing this framework, and giving ample background information on Algeria and Vietnam, Schalk proceeds with a vivid, in-depth account of the words and deeds of such intellectuals as Noam Chomsky, Susan Sontag, and Daniel Berrigan in the U.S., and Jean-Paul Sartre and Albert Camus in France. Drawing on hundreds of articles from books, newspapers, and magazines of the period--such as *The New York Review of Books*, and *Ramparts* (which had a circulation of 300,000 in 1967, but which disappeared within months of the end of the Vietnam War)--Schalk reconstructs in detail the turbulent decades which shook both American and French society. We recall how poet Robert Lowell snubbed Lyndon Johnson by refusing to participate in a White House arts festival, and how Sartre refused to accept the Nobel Prize (which his nemesis Camus had received a few years earlier). We witness Father Berrigan's acts of ultra-resistance, and his time spent in hiding and in jail, which Schalk helps us to compare to French activists like Francis Jeanson (who went underground to help the Algerian independence movement), and the Catholic radicals associated with the French magazine *Esprit* (which prophetically and stubbornly resisted the horror of the Algerian War). At a time when protest is out of fashion, and intellectuals themselves may be nearly extinct, this book presents a

needed reexamination of what it means for intellectuals to speak out about issues of international importance. *War and the Ivory Tower* provides a crucial analysis of intellectuals and their accomplishments in opposing two cruel and divisive wars which most people would like to forget.

[Moving Toward a Just Peace](#) Jan Marie Fritz 2013-11-18 Mediation, the facilitated discussion of disputes and conflicts, is a flexible approach that can be used at all levels of intervention to move us toward a global peace that is both inclusive and fair. This volume, edited by Jan Marie Fritz, brings together mediators, scholar-practitioners, and a veteran diplomat to discuss the life and times of mediation in very different settings. The 14 chapters include three essays about culture, creativity, and models/theories/approaches. And there are ten chapters about practice: community mediation, mediation by police, special education mediation; interventions on behalf of widows in Nigeria; capacity-building work in Burundi; mediation in Israel; the creative facilitation of meetings; community conferencing; UN Security Council Resolution 1325 (Women and Peace and Security) and the role of civil society organizations in peacebuilding. This volume discusses the expanding roles - from prevention through societal transformation - assumed by mediators and the urgent need for mediators working at different intervention levels to learn from each other. This volume is a must read for scholars, researchers, policymakers, civil society representatives and practitioners with interests in effective dispute and conflict intervention. It particularly is recommended for those managing dispute and conflict intervention processes.

The *Routledge Handbook of Placemaking* Cara Courage 2020-12-31 This Handbook is the first to explore the emergent field of 'placemaking' in terms of the recent research, teaching and learning, and practice agenda for the next few years. Offering valuable theoretical and practical insights from the leading scholars and practitioners in the field, it provides cutting-edge interdisciplinary research on the placemaking sector. Placemaking has seen a paradigmatic shift in urban design, planning, and policy to engage the community voice. This Handbook examines the development of placemaking, its emerging

theories, and its future directions. The book is structured in seven distinct sections curated by experts in the areas concerned. Section One provides a glimpse at the history and key theories of placemaking and its interpretations by different community sectors. Section Two studies the transformative potential of placemaking practice through case studies on different places, methodologies, and theoretical frameworks. It also reveals placemaking's potential to nurture a holistic community engagement, social justice, and human-centric urban environments. Section Three looks at the politics of placemaking to consider who is included and who is excluded from its practice and if the concept of placemaking needs to be reconstructed. Section Four deals with the scales and scopes of art-based placemaking, moving from the city to the neighborhood and further to the individual practice. It juxtaposes the voice of the practitioner and professional alongside that of the researcher and academic. Section Five tackles the socio-economic and environmental placemaking issues deemed pertinent to emerge more sustainable placemaking practices. Section Six emphasizes placemaking's intersection with urban design and planning sectors and includes case studies of generative planning practice. The final seventh section draws on the expertise of placemakers, researchers, and evaluators to present the key questions today, new methods and approaches to evaluation of placemaking in related fields, and notions for the future of evaluation practices. Each section opens with an introduction to help the reader navigate the text. This organization of the book considers the sectors that operate alongside the core placemaking practice. This seminal Handbook offers a timely contribution and international perspectives for the growing field of placemaking. It will be of interest to academics and students of placemaking, urban design, urban planning and policy, architecture, geography, cultural studies, and the arts.

Extraterritorial Use of Force Against Non-State Actors Noam Lubell 2010-05-27 This book analyses the primary relevant rules of international law applicable to extra-territorial use of force by states against non-state actors. Force in this context takes many forms, ranging from targeted killings and abductions of individuals to large-scale military operations amounting to armed conflict. Actions of this type have

occurred in what has become known as the 'war on terror', but are not limited to this context. Three frameworks of international law are examined in detail. These are the United Nations Charter and framework of international law regulating the resort to force in the territory of other states; the law of armed conflict, often referred to as international humanitarian law; and the law enforcement framework found in international human rights law. The book examines the applicability of these frameworks to extra-territorial forcible measures against non-state actors, and analyses the difficulties and challenges presented by application of the rules to these measures. The issues covered include, among others: the possibility of self-defence against non-state actors, including anticipatory self-defence; the lawfulness of measures which do not conform to the parameters of self-defence; the classification of extra-territorial force against non-state actors as armed conflict; the 'war on terror' as an armed conflict; the laws of armed conflict regulating force against groups and individuals; the extra-territorial applicability of international human rights law; and the regulation of forcible measures under human rights law. Many of these issues are the subject of ongoing and longstanding debate. The focus in this work is on the particular challenges raised by extra-territorial force against non-state actors and the book offers a number of solutions to these challenges.

**Coviability of Social and Ecological Systems: Reconnecting Mankind to the Biosphere in an Era of Global Change** Olivier Barrière 2019-03-12 This book considers the principle of 'sustainable development' which is currently facing a growing environmental crisis. A new mode of thinking and positioning the ecological imperative is the major input of this volume. The prism of co-viability is not the economics of political agencies that carry the ideology of the dominant/conventional economic schools, but rather an opening of innovation perspectives through science. This volume, through its four parts, more than 40 chapters and a hundred authors, gives birth to a paradigm which crystallizes within a concept that will support in overcoming the ecological emergency deadlock.

**Charter School Funding Considerations** Christine Rienstra Kiracofe 2022-01-01 Much has been written

about how public schools in the United States are funded. However, missing in the current literature landscape is a nuanced discussion of funding as it relates to public charter schools. This text, authored by researchers and professionals working in the charter school world, provides readers with a comprehensive overview of issues related to the funding and operation of charter schools. The book opens with an introduction to charter schools and how they are funded. The financial management and oversight of charter schools and issues related to funding equity, including how charter schools impact district school finances, are addressed. Special considerations for charter schools related to serving special education students and transportation issues are also addressed. After reading this book, readers will have a thorough understanding of how charter schools are funded and managed financially.

To Make the Earth Whole Marc Gopin 2009-06-15 To Make the Earth Whole studies the art of citizen diplomacy\_a process that can address clashes of religion and culture across regional lines even when traditional negotiations between governments can fail. While faith and regional differences have been sources of division around the world in recent decades, millions of citizens are also creating bonds of friendship and collaboration that are forming the basis of a global community. Drawing on the experiences gleaned from years practicing citizen diplomacy in some of the world's most politically charged climates, scholar-practitioner of conflict resolution and rabbi Marc Gopin describes his work in Syria as a central case study of the book. The author outlines the strategic basis for creating community across lines of enmity, the social network theory to explain how this happens, and the long term vision required for a progressive but inclusive global community that respects religious communities even as it limits their coercive power over others. This powerful and practical book outlines an incremental and evolutionary strategy of positive change that stands a strong chance of success, even in today's most conservative and repressive religious and political contexts. To Make the Earth Whole also examines the ethical challenges of citizen diplomacy from the perspectives of both Western and Eastern philosophies and religions. The world's wisdom traditions are essential in devising a way for citizens to develop the

foundations for global community.

Prosecuting Conflict-Related Sexual Violence at the ICTY Baron Serge Brammertz 2016-04-14 Although sexual violence directed at both females and males is a reality in many on-going conflicts throughout the world today, accountability for the perpetrators of such violence remains the exception rather than the rule. While awareness of the problem is growing, more effective approaches are urgently needed for the investigation and prosecution of conflict-related sexual violence crimes. Upon its establishment in 1993, the Office of the Prosecutor (OTP) of the International Criminal Tribunal for the Former Yugoslavia (ICTY) began the challenging task of prosecuting the perpetrators of conflict-related sexual violence crimes, alongside the many other atrocities committed during the conflicts in the former Yugoslavia. This book documents the experiences, achievements, challenges, and fundamental insights of the OTP in prosecuting conflict-related sexual violence crimes at the ICTY over the past two decades. It draws on an extensive dossier of OTP documentation, court filings, trial exhibits, testimony, ICTY judgements, and other materials, as well as interviews with current and former OTP staff members. The authors provide a unique analytical perspective on the obstacles faced in prioritizing, investigating, and prosecuting conflict-related sexual violence crimes. While ICTY has made great strides in developing international criminal law in this area, this volume exposes the pressing need for determined and increasingly sophisticated strategies in order to overcome the ongoing obstacles in prosecuting conflict-related sexual violence crimes. The book presents concrete recommendations to inform future work being done at the national and international levels, including that of the International Criminal Court, international investigation commissions, and countries developing transitional justice processes. It provides an essential resource for investigators and criminal lawyers, human rights fact-finders, policy makers, rule of law experts, and

academics.

God at War Gregory A. Boyd 2014-06-18 Modern Christians are often baffled by the problem of evil, frequently attributing pain and suffering to some mysterious "good" purposes of God. Gregory Boyd instead declares that biblical writers did not try to intellectually understand evil but rather grappled to overcome it.

World Migration Report 2005 International Court of Justice 2005-05-24 Where are people migrating today and why? What are the implications for the world's developing and industrialized economies? And what are the key issues facing policy makers in migrant origin, destination, and transit countries? *World Migration 2005* analyses the effects of globalization, trade liberalization, economic integration and the widening gap between rich and poor nations on migration flows. It looks at the impact of the world's 185 million migrants and their potential contribution to socioeconomic development and cultural enrichment both at home and abroad. And it identifies the multidimensional migration management policies needed by governments to create the optimal return to both migrants and society, while minimizing the abuses

associated with irregular migration.

Water, Security and U.S. Foreign Policy David Reed 2017-06-26 The prosperity and national security of the United States depend directly on the prosperity and stability of both partner and competing countries around the world. Today, U.S. interests are under rising pressure from water scarcity, extreme weather events and water-driven ecological change in key geographies of strategic interest to the U.S. Those water-driven stresses are undermining economic productivity, weakening governance systems and fraying social cohesion in scores of countries and, in the process, undermining the vitality of rural livelihoods, fostering local and ethnic conflicts, driving broad migratory movements and contributing to the growth of insurgencies and terrorist networks. While the U.S. intelligence community has steadily expanded natural resource concerns in their global threat analyses, our overseas development assistance remains locked into provision of water and hygienic services rather than responding to the full sweep of global water challenges including governance and policy failures, growing conflicts over water and the need for promoting sustainable transboundary water arrangements in partner countries. A fundamental departure from the past is urgently needed. Based on 18 case studies, Water, Security and U.S. Foreign Policy provides an analytical framework to help policy makers, scholars and researchers studying the intersection of U.S. foreign policy with the environment and sustainability issues, interpret the impacts of water-driven social disruptions on the stability of partner governments and U.S. interests abroad. The book also delivers specific recommendations to reorient U.S. development and diplomatic engagements that can forestall and prevent social disruptions and ensuing threats to U.S. prosperity and national security.

The Handbook of Race, Ethnicity, Crime, and Justice Ramiro Martinez, Jr. 2018-06-19 This Handbook presents current and future studies on the changing dynamics of the role of immigrants and the impact of immigration, across the United States and industrialized and developing nations. It covers the changing dynamics of race, ethnicity, and immigration, and discusses how it all contributes to variations in crime, policing, and the overall justice system. Through acknowledging that some groups, especially people of color, are disproportionately influenced more than others in the case of criminal justice reactions, the “War on Drugs”, and hate crimes; this Handbook introduces the importance of studying race and crime so as to better understand it. It does so by recommending that researchers concentrate on ethnic diversity in a national and international context in order to broaden their demographic and expand their understanding of how to attain global change. Featuring contributions from top experts in the field, The Handbook of Race and Crime is presented in five sections—An Overview of Race, Ethnicity, Crime, and Justice; Theoretical Perspectives on Race and Crime; Race, Gender, and the Justice System; Gender and Crime; and Race, Gender and Comparative Criminology. Each section of the book addresses a key area of research, summarizes findings or shortcomings whenever possible, and provides new results relevant to race/crime and justice. Every contribution is written by a top expert in the field and based on the latest research. With a sharp focus on contemporary race, ethnicity, crime, and justice studies, The Handbook of Race and Crime is the ideal reference for advanced undergraduate students, graduate students, and scholars interested in the disciplines such as Criminology, Race and Ethnicity, Race and the Justice System, and the Sociology of Race.

From Historical to Critical Post-Colonial Theology Robert S Heaney 2016-05-26 What is post-colonial theology? How does it relate to theology that emerged in historically colonial situations? These are two questions that get to the heart of Robert S. Heaney's work as he considers the extent to which

theologians predating the emergence of post-colonial theology might be considered as precursors to this theological movement. Heaney argues that the work of innovative theologians John S. Mbiti and Jesse N.K. Mugambi, important in their own right, must now also be considered in relation to the continued emergence of post-colonial theology. When this is done, fresh perspectives on both the nature of post-colonial theology and contextual theology emerge. Through a sympathetic and critical reading of Mbiti and Mugambi, Heaney offers a series of constructive moves that counter the ongoing temptation toward acontextualism that continues to haunt theology both in the North and in the South.

The Minority Muslim Experience in Mainland Southeast Asia John Goodman 2021-07-13 This book examines the lives of the Malay and Cham Muslims in Thailand, Cambodia and Vietnam and examines how they co-exist and live in societies that are dominated by an alternative consensus and are illiberal and non-democratic in nature. Focusing on two major Muslim communities in Southeast Asia, both of whom live as minorities in societies that are not democratic and have a history of hostility and repression towards non-conforming ideas, the book explains their circumstances, the choices and life decisions they have to make, and how minorities can thrive in an unfriendly, monocultural environment. Based on original field work and research, the author analyses how people live, and how they adapt to societies which are not motivated by Western liberal ideals of multiculturalism. The book also offers a unique perspective on how Islam develops in an environment where it is seen as alien and disloyal. A useful contribution analyzing historical and post-colonial experiences of Muslim minorities and how they survive and evolve over the course of state monopoly in mainland Southeast Asia, this book will be of interest to academics working on Muslim minorities, Asian Religion and Southeast Asian Studies.
