The Evolution of Legal Business Forms in Europe and the United States Erik M. Vermeulen 2003-01-01 The evolution of partnership forms is stimulated by powerful economic forces that can lead to widespread prosperity and wealth creation for a society. Given the importance of closely held firms in the United States and Europe, The Evolution of Legal Business Forms in Europe and the United States argues that partnership law should trouble itself less with historical and descriptive arguments about the legal rules and structure of the partnership form and focus much more on the new analytical apparatus of the economics of organizational form as well the fundamental economic learning that informs the debates on limited liability, partnership rules regarding management and control, conflict resolution and fiduciary duties. Introducing and extending the best available theories from law and economics, particularly those from the theory of the firm, This book's analysis demonstrates that the patterns of European partnership law and its recent history are best understood from an economic and comparative law perspective. By examining the economic theories of the firm and the economics of organization choice, The Evolution of Legal Business Forms in Europe and the United States conceives partnership-type business forms as contractual entities. The key feature of the modern partnership form is that partners have significant flexibility and power to limit their liability, transfer all of their rights, and to freely exit the firm. Another key feature of partnership law is the insight that lawmakers should provide the rules and enforcement mechanisms to regulate the important relationships within the partnership. This book applies an efficiency test to determine which sets of default rules are likely to resolve the main problems in partnerships. Having identified partnership law with the economic theory of organization, The Evolution of Legal Business Forms in Europe and the United States then goes to argue that most of partnership law is directed at offering bundles of legal rules for different types of firms. Lawmakers should promote partnership rules that attract investors and can be expected to be efficient if they allow entrepreneurs to freely select the bundle of rules that best match their priorities. In a modern vision of partnership law, lawmakers promote economic welfare through creating non-mandatory rules that allow multiple businesses to switch to a favourable business form without significant costs. Jurisdictions plagued by falling incorporations and low levels of small and medium business activity, should abandon the mandatory and standardized framework and the 'lock in' effect that it promotes, and focus on the mechanisms of legal evolution and rules that tend to mimic the market. This innovation work will have ramifications felt across European jurisdictions, and will be debated by a large audience of policymakers and academic lawyers involved in law reform. Moreover, the book will receive serious attention from students of law and economics, as well as practising lawyers involved in resolving complex issues of organizational law. Review (s) ?Vermeulen's work makes a significant contribution to the dialogue between legal scholars and policy makers from Europe and the United States on the matter of business entity law reform. The volume is ambitious in scope, thoughtful in approach, and accurate in result. It shows a well-read and nuanced view of the recent American partnership law reform debates. He moves with assurance between different systems of law and analysis, and has a confident sense of what his diverse readers need to know to come to the ultimate discussion with a common sense of the issues and alternatives at hand. Vermeulen's work should serve as a starting point for a robust discussion among scholars and policy makers.?

Intestacy and family provision claims on death Great Britain: Law Commission 2011-12-14 This report makes recommendations for reform of the law and presents two draft Bills to implement the necessary changes. Firstly, The draft Inheritance and Trustees' Powers Bill includes reforms that would: ensure that where a couple are married or in a civil partnership, assets pass on intestacy to the surviving spouse in all cases where there are no children or other descendants; simplify the sharing of assets on intestacy where the deceased was survived by a spouse and children or other descendants; protect children who suffer the death of a parent from the risk of losing an inheritance from that parent in the event that they are adopted after the death; amend the legal rules which currently disadvantage unmarried fathers when a child dies intestate; remove arbitrary obstacles to family provision claims by dependants of the deceased and anyone treated by the deceased as a child of his or her family outside the context of a marriage or civil partnership; permit a claim for family provision in certain circumstances where the deceased died "domiciled" outside of England and Wales but left property and family members or dependants here; and reform trustees' statutory powers to use income and capital for the benefit of trust beneficiaries (subject to any express provisions in the trust instrument). Secondly, The draft Inheritance (Cohabitants) Bill contains further provisions that would give certain unmarried partners who have lived together for five years the right to inherit on each other's death under the intestacy rules. Where the couple have a child together, this entitlement would accrue after two years' cohabitation, provided the child was living with the couple when the deceased died.
