Virgins, Harlots and Sex David Chesney 2011-02-14 AN Earthy Look At Christianity. Many biblical terms have a consistent symbolic significance from Genesis to Revelation eg nudity, light and darkness, virgins, harlots. Nudity occurs in three of the most significant events in the whole Bible, and in every case it is best understood symbolically. This book demonstrates that symbolism is so powerful it can, for example, change the status of Isaiah's virgin birth prophecy from an absurdity to an astonishing fulfilment of prophecy. Harlots (described in the book as God's warning lights) also figure very prominently in the biblical coverage of both Jews and Christians. Another key theme is to show that the raw seed-concepts of the Hebrew Bible evolve so neatly into the Christian New Testament viewpoint over a 1000+ years that readers may conclude uninspired biblical script writers could not have organized it. Here are some quotes from the book that introduce intriguing and/or provocative new trains of thought: 1 "If you think linking sex with religious experience is a bit rich then you need to do some more Bible study." 2 "Indulgence in adultery is the most obvious of the sins proscribed in the Ten Commandments that could trace directly to hormonal influences." 3 "Should we be joining Haters Anonymous, Schadenfreude Anonymous or Egotists Anonymous . . . in order to qualify for a better land and to actually enjoy it." 4 "Some of our excretory functions are less than ideal for a brand new earth . . . the creator team could have done better by us . . . if they wanted to." 5 "It is tacitly assumed God did not conduct experiments in His creation efforts. No need to . . . He knows the end from the beginning! But . . ." Other challenging insights emerge in connection with Lot's use of his daughters as sex-sops, the possible symbolic significance of the Mosaic decree to cut off a lady's hand if she squeezed testicles, the massaging of data in St Matthew's genealogies, a religious uncertainty principle, and the reason God doesn't do something to stop the frightful things happening in the world. This is not a book built on hype and emotion. It makes extensive use of scholarly sources but has a light-hearted journalistic approach and is easy to read. In exploring the spiritual import of sexual issues in nature and revelation it offers fresh perspectives on the bitter creation-evolution debate, the gross and genocidal behavior of the chosen people, the currently unacceptable biblical restrictions on human sexual behavior, and the decidedly low-key role of women in organized religion. Innovative, succinct, engaging, thought-provoking, and sometimes shocking!

21st Century Common Sense Mark Fraizer 2012-05 21st Century Common Sense was the brainchild and the first book ever written by author Mark Fraizer. Using language, concepts, and format from such historically significant works as The Federalist Papers and Common Sense, Fraizer brings to life a new perspective to many of the issues that face our great nation in the present. By grounding his logic and principles in his Christian background, as well as his education and life experiences, he writes as if speaking to the reader; bringing to light real solutions to many seemingly unsolvable problems. Demanding results on problems that are continuously overlooked, often for generations, meanwhile pleading with his fellow countrymen to unite for the benefit of a nation. A quick read, this book will inspire those from every generation and walk of life. Expressing widely held generational views in order to promote reform, action, and discussion. Mark Fraizer was born on April 18, 1988, in a small town located in Central Ohio. Born and raised in Newark, Ohio, Mark was the second of two children born to parents C.D. and Linda Fraizer. Raised a protestant Christian, it was deemed necessary by his parents that he should be well rounded and unprejudiced: playing soccer, musical instruments, and volunteering within his community. Being raised in a "battleground state," political discussions are very commonplace due to the mixing of political ideologies throughout Ohio's population. Although raised a Republican, he was a moderate that focused on the reasons behind political belief. Reared as a Republican, educated as a liberal, and his numerous life experiences all helped to create the perspectives he brings forth in this book.

Weaving gripping stories of his adventures throughout, he and coauthor Susan Schiefelbein address the risks we take with human health, the overfishing and sacking of the world's oceans, the hazards of nuclear proliferation, and the environmental responsibility of scientists, politicians, and people of faith. This prescient, clear-sighted book is a remarkable testament to the life and work of one of our greatest modern adventurers.

New Perspectives on Safavid Iran Colin P. Mitchell 2011-03-03 Dedicated to the renowned Safavid historian Roger Savory, this book brings together a collection of studies on the Safavid state of Iran (1501-1722) from the perspectives of political, social, literary, and artistic history. Savory, a doyen of Safavid studies in the 1960s and 1970s, was responsible for expanding and popularizing the study of Iran in the 16th and 17th century. To celebrate this legacy, well-established scholars of medieval and early modern Iran have contributed specific studies reflecting an array of research interests and specializations, which include critical re-examinations of issues of gender, literature, art and architecture, cultural and linguistic currents, illustrated historical chronicles, and courtly and administrative practices under the Safavid dynasty. This unique compilation is indicative of a growing interest in Iran and Iranian studies in both the academic and public spheres, and as such contains a number of new perspectives which will serve to supplement and re-interpret the existing corpus of Safavid scholarly literature to date. It will be an important text for scholars of world history and Middle East studies, as well as to historians in general.

Conscientious Objector Wayne R. Ferren Jr. 2021-03-16 What would you do if you were drafted to fight in a war? As a conscientious objector opposed to all wars, Wayne R. Ferren Jr. had to answer that question during the Vietnam War. He called on his religious and scientific backgrounds as well as his environmental activism to argue that he should be excluded from fighting in, or supporting this war. Following a successful defense of his claim, Wayne served two years of alternative civilian service, which influenced his professional and personal life for the next fifty years. Decades after his service, he was shocked to find his name on the Vietnam War Memorial, which turned out to be that of another young man with a similar name born the same year Wayne was born. That man died in 1968 when his plane was hit by artillery fire and crash landed at Khe Sanh Marine Combat Base. He will forever remain a teenage father killed in a senseless war. To this day, the duality haunts the author, and in this multifaceted memoir, he looks back at a lifetime and how his background, scientific training, and transcendentalism have guided him on a path of conscientious objection, service, and conservation, believing all things are sacred.

Various types of hydraulic structures, their associated equipment, and the various systems for collecting data are described. These four volumes are aimed at the following five major target audiences: University and College Students Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers, NGOs and GOs.

Typecasting Stuart Ewen 2011-01-04 Typecasting chronicles the emergence of the "science of first impression" and reveals how the work of its creators—early social scientists—continues to shape how we see the world and to inform our most fundamental and unconscious judgments of beauty, humanity, and degeneracy. In this groundbreaking exploration of the growth of stereotyping amidst the rise of modern society, authors Ewen & Ewen demonstrate "typecasting" as a persistent cultural practice. Drawing on fields as diverse as history, pop culture, racial science, and film, and including over one hundred images, many published here for the first time, the authors present a vivid portrait of stereotyping as it was forged by colonialism, industrialization, mass media, urban life, and the global economy.

The Beast on the East River Nathan Tabor 2006-10-29 "Is the United Nations the benign force for good that so many proclaim? Or is there a darker agenda at work behind the scenes? Nathan Tabor reveals the sinister plan behind the glossy image of world cooperation painted by the UN and its defenders. The Beast on the East River includes original research into key policy areas, including population control, education, and the international criminal court. And it offers practical steps that concerned American citizens can take before it's too late. In his debut book, rising conservative voice Nathan Tabor offers a frightening exposé of the United Nations' global power grab and its ruthless attempt to control US education, law, gun ownership, taxation, and reproductive rights. "We are already very nearly at the point of no return," says Tabor, "and most Americans aren't even aware of the impending danger. This book is a call to immediate action?read its contents very carefully. What you will discover may surprise and anger you."

Leugenaars en vervalers Roelf Bolt 2011-09-06 Wat hebben Albert Einstein, Karel Appel, Boudewijn Büch, Cicero, Jules Croiset, Ptolemeus, René Diekstra, Ernest Hemingway, François Mitterrand en Marco Polo allemaal met elkaar gemeen? Ze staan in Leugenaars en vervalers van Roelf Bolt. Leugenaars en vervalers omringen ons. En dan hebben we het niet alleen over valsemunters, sjoemelende kunsthandelaren en overspeligen: in bijna vijfhonderd lemmas behandelt deze `encyclopedie` allerhande sterfgevallen, vorstelijke aanspraken, eieren, kinderscharen, wetenschappelijke vondsten, bonbons, boeken, zebras, sekse want het is zo gek niet te bedenken of het wordt vervalst. Eigenbelang is vaak een motivatie, maar ook ideologie, rancune, liefde en haat of een goed gevoel voor humor. Naast onbekenden die enkel door bedrog voor het voetlicht traden, bevat het boek een groot aantal beroemde personen. Een vrolijk makend boek voor bedriegers en bedrogenen.

Cartesian Views Thomas Lennon 2003-09-25 A dozen papers by internationally known scholars explore questions largely unthinkable without Richard Watson's classic Downfall of Cartesianism: Descartes in Holland, Descartes and Simon Foucher, and issues raised by Descartes for philosophy of mind, philosophy of science, translation and toleration.

From Birth to Adolescence Rev. Winston T. Jones 2018-02-06 The process of taking care of a physical baby in the world today is by far a sacrificial, tedious, yet gratifying endeavor for any parent. To hear the first words of a baby and to watch them take their first steps is nothing short of pure ecstasy for any parent! The role we play as parents is important to help our children grow and mature into successful adults, by providing them with physical, emotional, and spiritual nourishment. Just as the physical baby needs nourishment, so does the Christian. Rev. Winston Jones explores and dissects many of the ways in which a natural baby would live, function, and survive in the world today and provides some powerful parallels for the new Christian in Christ. This book is a simplistic approach to explain the walk of the new Christian from birth to adolescence. His book is a welcome into the church and Christianity today and is inviting to all who wish to be born again through Christ.

Nonhuman DNA Typing Heather Miller Coyle 2007-08-29 The association of a suspect with the victim or crime scene through DNA evidence is one of the most powerful statements of complicity in a crime imaginable. No category of evidence has ever had the complete capacity to convict or exonerate an accused so absolutely in the eyes of the public. With the discriminatory powers of DNA and the variety of DNA markers now in regular use, the one thing keeping a third of all cases unsolved is the lack of human DNA evidence. However, the identification of polymorphic genetic loci in cats, dogs, plants, insects, bacteria, and viruses can provide the critical link between suspect and scene in the absence of human DNA. Non-Human DNA Typing: Theory and Casework Applications provides an introduction to the basic science underlying the emerging field of non-human DNA typing. It examines the use of non-human DNA evidence not just in homicide cases, but also in drug trafficking, poaching of endangered species, livestock fraud, and missing persons, as well as the identification of primary and secondary crime scenes. The book demonstrates the recognition, collection, and preservation of biological evidence at a crime scene, techniques of DNA fingerprinting, and DNA profiling. Using a wide variety of examples, applications, and case studies, the author describes the STR analysis of canine and feline samples, insects, and fungi, and their role as evidence in forensic science. Chapters consider the development of testing methods for animal evidence, soil DNA typing, and the use of DNA typing in wildlife investigations. A useful appendix includes an overview of the history of forensic serology and DNA. Combining science, case examples, legal decisions, and references, Non-Human DNA Typing: Theory and Casework Applications presents the forensic and

legal applications of non-human DNA evidence for scientists, law enforcement, and attorneys.
