The Hate U Give Angie Thomas 2017-05-29 Starr Carters beste vriend Khalil wordt doodgeschoten door een politieagent. Khalil had geen wapen op zak maar was 'vermoedelijk' een drugsdealer. Verslagen door emoties probeert Starr zichzelf te herpakken in een samenleving vol ongelijkheid. De armoedige buurt waarin ze woont geeft een groot contrast met de school waar ze elke dag naartoe gaat. Overleven in deze twee werelden wordt steeds lastiger en de waarheid spreken krijgt een hoge prijs.

Stock Options and the New Rules of Corporate Accountability Donald P. Delves 2004 "As a former CEO and independent director of several corporations, I find Don Delves' discussion of executive compensation -- including detailed and insightful reviews of the issues involving stock options -- to be exceedingly instructive. This is a book that members of compensation committees, indeed all corporate board members should read." -B. Kenneth West, Former CEO, Harris Trust and Savings Bank and member of several corporate boards. Guidelines for curbing today's stock option abuses, and making "payment for performance" the new imperative Stock options account for up to 90 percent of the average CEO's compensation--despite a falling stock market and often plunging corporate earnings. Stock Options and the New Rules of Corporate Accountability examines this hot-button issue, proposing new methodologies and techniques for better aligning stock options, executive compensation, performance rewards, and accounting, and making sense of what has become today's most controversial form of compensation. Executive compensation authority Don Delves explains how high-profile corporations like GE and Coca-Cola have opted to expense stock options and have adjusted their policies to prevent options from becoming disincentive tools, and he shows others how to follow suit. In addition, Delves gives decision makers the knowledge they need to: Increase accountability by treating stock options as expenses Balance options with other incentives Create healthier contracts between employers and employees

International Classification of Financial Reporting Christopher Nobes 1992-01-01 With the growing integration of the international economy the international differences in financial reporting practices have never been so important in multinational business. Recent reforms in International Accounting Standards, combined with the continuing European harmonization, have placed this topic high on the current agenda of both researchers and of business analysts actively concerned with international accounting practice. This new, updated edition of Christopher Nobes' International Classification of Financial Reporting examines the causes and nature of the differences between financial reporting practices in different countries, charting all the many significant developments to have taken place through the 1980s. The relevant research published during this period is discussed, alongside the effects of the regulatory changes that have taken place. Improvements in the existing system of classification in financial reporting are proposed in the light of the accelerated process of harmonization currently taking place. The resulting volume is an indispensable source for academics and professionals in international accounting and for all who are engaged in the process of European harmonization.
