Gang Ding 2019-09-16 Selected Essays on China's Education: Research and Review (4 volumes) consists of 22 most influential theses on the history and tradition of Chinese Education. These essays explore important educational and cultural issues in China with a transcultural perspective.

Essays on Research Methodology Dinesh S. Hegde 2015-06-03 The book presents a collection of essays addressing a perceived need for persistent and logical thinking, critical reasoning, rigor and relevance on the part of researchers pursuing their doctorates. Accordingly, eminent experts have come together to consider these significant aspects of the research process, which result in different knowledge claims in different fields or subject areas. An attempt has been made to find a common denominator across diverse management disciplines, so that the broadest range of researchers can benefit from the book. The topics have been carefully chosen to cover problem formulation, contextualizing, soft & hard modeling, qualitative and quantitative analysis and ethical issues, in addition to the design of experiments and survey-based research. The distinguishing feature of this book is that it recognizes the diverse backgrounds of scholars from different interdisciplinary areas as well as their varying needs with regard to modeling, observations,

measurements, aggregation, data analyses, etc. After all, researchers are expected to deepen our understanding, expand on existing information, introduce fresh insights, present new evidence and/or disprove accepted theories, hypotheses etc. More importantly, the book cautions against the over-reliance on software packages and mechanical interpretation of results based on the size, sign and significance of the coefficients obtained. Instead, the focus is on the underlying theories, hypotheses and relationships and on establishing new ones. In doing so, due care is taken to clearly enunciate what exactly constitutes a knowledge claim and what is methodology as distinct from methods, tools and techniques.

How to Write Social Sciences Research Paper: For Students and Professionals Alan Smith, PhD 2016-02-29 In a research project, the most critical part is writing the report in a way which presents not just our findings, but the process through which we arrived at these findings. It demands honesty about our research design and our perspectives, so that others can understand not just the research we have produced, but something about the way in which we have produced it. When carrying out research it is all too easy to become embroiled in our own research questions and objectives, so that when it comes to presenting our research we forget about situating it within the wider body of knowledge. For the lack of proper knowledge, many people find it

difficult to writing up their paper. This book is intended to help you organize and write a quality research paper for Social Sciences. This book also gives you the idea about research design.

Everyone Can Write Howard Gelman 2015-03-15 Everyone Can Write is an easy-to-understand, practical, 'how to write' book that is accessible to everyone from a business executive wanting to polish his reports to a retiree wanting to chronicle her family history. It solves the problems that beginning writers struggle with by giving them an easy-to-follow and simple set of rules that allows them to write rapidly and clearly. The book outlines the three forms of non-fiction writing: report, narrative and essay. Each one is dissected and a set of rules applied to each structure. The rules are easily put into practice and vary for each structure. For example, in report writing, two easy-to-apply rules are: 25 words to a sentence and 3 or 4 sentences in a paragraph. The author has also developed a foolproof method of structuring your writing, so that you make effective use of your time. It's based on the easy-to-remember three step formula: Pre-write, Free-write, Re-write. Pre-write refers to researching the necessary information. Free-write refers to getting the information onto the computer screen. Re-write refers to the essential task of editing the writing into clear readable text. This technique allows writers to become the editors of their own writing, thereby dramatically improving its quality. The essentials of

grammar and punctuation, easily confused words and other useful tips for writers are also covered.

100 Activities for Teaching Research Methods Catherine Dawson 2016-08-08

A sourcebook of exercises, games, scenarios and role plays, this practical, user-friendly guide provides a complete and valuable resource for research methods tutors, teachers and lecturers. Developed to complement and enhance existing course materials, the 100 ready-to-use activities encourage innovative and engaging classroom practice in seven areas: finding and using sources of information planning a research project conducting research using and analyzing data disseminating results acting ethically developing deeper research skills. Each of the activities is divided into a section on tutor notes and student handouts. Tutor notes contain clear guidance about the purpose, level and type of activity, along with a range of discussion notes that signpost key issues and research insights. Important terms, related activities and further reading suggestions are also included. Not only does the A4 format make the student handouts easy to photocopy, they are also available to download and print directly from the book's companion website for easy distribution in class. The Research Guide for the Digital Age Francis A. Burkle-Young 1997 Modern

college undergraduates in America generally come to the classroom with no instruction at all in writing the traditional, lucid, formal essay. This small guide to college students will illustrate, clearly and logically, those principles of inquiry, curiosity, discovery, and enthusiasm which will vitalize their future academic careers and their lives as rational and thoughtful adults. A significant number of other texts have appeared over the past decades which also lead the freshman or sophomore student through the processes of doing research and analysis -both on the scientific and the historical method. Few, however, offer an adequate introduction to the new technical methods for identifying, recovering, and assembling relevant research information.

Goals for Academic Writing Alister H. Cumming 2006-01-01 This book documents the results of a multi-year project that investigated the goals for writing improvement among 45 students and their instructors in intensive courses of English as a Second Language (ESL) then, a year later, in academic programs at two Canadian universities. The researchers present a detailed framework to describe these goals from the perspectives of the students as well as their instructors. The goals are analyzed for groups of students from particular backgrounds internationally, for changes over time, and in relation to the ESL and academic courses. The authors use activity theory, goal theory, various sociolinguistic concepts, and multiple data sources (interviews, observations, stimulated recalls, questionnaires, and text analyses) to provide a contextually-grounded perspective on learning,

teaching, writing, second-language development, and curriculum policy. The book will interest researchers, educators, and administrators of ESL, university, college, and literacy programs around the world.

Writing For Academic Purpose Eny Maulita Purnama Sari, S.Pd.I., M.Pd. This handout can be one of instructional textbooks used in the teaching of writing of English in Indonesia. It aims to provide a framework for teaching and learning English based on blended learning. All three chapters allow the students to practice academic writing by blended learning in e-learning system which help them to develop their academic writing skills. By having this skill, they can construct and establish academic writing correctly. It also enables them to study genre autonomously. The strengths of this handout such as effectiveness of using blended learning in the writing for academic subject, autonomous learning, and practice make a better academic writing. Then, this handout was developed based on the students' need. In this handout, students not only found genre but also found characteristics, ways, and the rules of language in academic writing. Here, the writers would like to thanks to validators and students who give inputs and suggestions in improving the

process of developing materials and models.

Carleton Papers in Applied Language Studies 1984

Writing Your Heritage Deborah Dixon 1993 This teaching guide is the result of 3 years of thinking, trying, rethinking, and trying again with an assignment sequence in which one instructor attempted to address the personal as well as the academic needs of students in the Program of Intensive English at the University of California at Santa Barbara. According to the guide, many of these students--Hispanics, African Americans, Asian Americans, Native Americans, and Caucasians--lack fluency in written English and find writing onerous. The guide states that the writing sequence combines reading, short writing exercises, and journal entries, plus individual and group activities that culminate in a series of essay assignments. It explains that this series focuses on the heritage and backgrounds of students, and takes them from "Noting Down" journal writings; through "Looking Back" personal recollection and family stories; through "Looking Into" research projects and research papers; to the "Thinking Through" thesis essay. The guide states that the curriculum is

structured so that each assignment builds not only on preceding exercises and essay assignments, but also anticipates those that follow, and includes an introduction to the student's notebook that synthesizes all that has been discussed, written, and experienced. Appended are reading assignments, a list of 13 library resources, a list of 19 additional readings, and a grading rubric. (NKA)

The SAGE Guide to Writing in Policing Jennifer M. Allen 2019-12-02 The SAGE Guide to Writing in Policing: Report Writing Essentials equips students with transferable writing skills that can be applied across the field of policing - both academically and professionally. Authors Steven Hougland and Jennifer M. Allen interweave professional and applied writing, academic writing, and information literacy, with the result being a stronger, more confident report writer. Students are also exposed to a number of best practices for various elements of report writing, such as the face page, incident reports, supplemental reports, investigative reports, and traffic reports, as well as

search warrants and affidavits.

Who's Your Source? Melissa M. Bender 2020-03-15 While students today have access to more sources of information than ever before, they are not necessarily equipped to make informed judgments about those sources. Teaching students to evaluate sources has become even more challenging in the last year, as issues regarding fake news and “alternative facts” have become a heated matter in conversations taking place in the public sphere. The book will present students with a set of tools that they can use to evaluate any source that they encounter. In addition to learning how to use sources in their writing, students who read *Who's Your Source?* will become more savvy consumers of the sources they encounter in their daily lives.

The Analytical Writer Adrienne Robins 1995-09 In *The Analytical Writing* Adrienne Robins explains college writing as a process of discovery, as a series of strategies that any college student can learn to apply. All strategies explained in this text are based on sound theories of teaching writing and on the patterns of successful writers. Writing and thinking should not be separated, and presenting only the steps without the accompanying explanation of how they influence thinking would be of little more help than

having no method at all. By using this text the students will see as they plan, draft, and revise how their writing helps clarify their thoughts. This clearly written and engaging textbook is illustrated by real examples of student writing and appropriate cartoons. The second edition was revised and updated based on the large-scale evaluation of the first edition completed by professors and students. The new edition reflects four essential values: recognizing the diversity of writing processes, the necessity of peer and teacher interaction with the writer on drafts, the integration of writing and reading, and the appropriate uses of technology. Specific features of this second edition include: -new writing samples -electronic citation formats -updated library use chapter with technological guidance -concise paragraph chapter -revised introduction and conclusion chapter -rhetorical as well as grammatical explanations for punctuation usage -new cartoons -exercises drawn from students' papers -a condensed chapter on research papers -and an expanded, and clearer, chapter on special assignments and other writing tasks A Collegiate Press book

Greenhouse Warming and Nuclear Hazards Peter Fong 2005-11-24 This book is a rebuttal of the common belief that grave environmental consequences are

associated with the issues of global warming and nuclear hazards. Firstly, it is argued that after 25 years of research no-one has actually found evidence for greenhouse warming. Instead, the heat has caused the evaporation of ocean water to increase cloud coverage, reflecting more sunlight away, cooling down the earth and nullifying the effects of greenhouse warming. The author describes this revolution in climatology through new scientific discoveries that solve the longstanding mystery of the ice ages and explain the enigma of the missing greenhouse heat. The solution of the ice age problem is a far most important scientific accomplishment. In the second part of the book, the author argues that the effects of low-level radiation can be beneficial rather than damaging. Evidence is presented proving that low-level radiation in the US from both natural sources and human activities such as nuclear bombs tests actually reduces death rates from cancer and other diseases and increases longevity. In the Indian State of Kerala life span has been shown to increase 10.5 years due to the natural radiation from thorium mines. The book proposes that primitive life forms must have developed immune systems to counter the harmful effects of natural radioactivity and that low-level radiation from nuclear waste may one day be transformed from trash to treasure. Nature has always

been kind to humans. But our self-aggrandizing species has mistaken blessings for disasters and spoiled the otherwise splendid 20th century.

The HM Learning and Study Skills Program Judy Tilton Brunner 2016-10-14

Level III (Grades 11-13) The hm Learning and Study Skills Program: Level III was designed to provide an introduction to learning and study skills for high school juniors and seniors and beginning college students through a series of activity-oriented units. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills: more succinctly, that “learning by doing” is the best way “study smart.” Learning and study skills are important for learning. They are methods and ways of doing things that help make learning easier. Understanding how to study can also facilitate learning by assisting students as they complete assignments correctly and efficiently during a specified period of time. Just like any other skill, knowing how to learn and study proficiently must be learned and practiced over time. The Program has been designed to help students learn more efficiently and effectively.
