Developing and Validating Test Items Thomas M. Haladyna 2013-07-18 Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and Validating Multiple-Choice Test Items*, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible – No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity – Validity, the most important consideration in

testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples – The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research – A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors.

Industrialisation and Society Neil Tonge 1993 Targeted specifically at A-Level students, the Challenging History series provides a continuation from the GCSE approach, whilst also taking into account changes in the A-Level syllabus and historical research. By closely examining documentary evidence and posing questions, the six books in the series provide accessible guides to history from the 15th century onwards. Each chapter in the books is divided into four sections - preview, text, examining evidence and focus. The preview section is a presentation designed to arouse students' interest and to lay out the major themes of the chapter. The text sections contain a narrative of the period. The examining evidence sections present the student with a wide variety of historical sources and the focus section highlights particular events, people and issues of the period. Talking points scattered throughout the books encourage students to question their preconceptions and test ideas. There are also questions in every chapter, which invite the students to discuss the issues and present written responses.

Gender, Work and Wages in Industrial Revolution Britain

Joyce Burnette 2008-04-17 A major study of the role of

women in the labour market of Industrial Revolution

Britain. It is well known that men and women usually worked in different occupations, and that women earned

lower wages than men. These differences are usually attributed to custom but Joyce Burnette here

demonstrates instead that gender differences in

occupations and wages were instead largely driven by

market forces. Her findings reveal that rather than

harming women competition actually helped them by

eroding the power that male workers needed to restrict

female employment and minimising the gender wage gap

by sorting women into the least strength-intensive occupations. Where the strength requirements of an occupation made women less productive than men, occupational segregation maximised both economic efficiency and female incomes. She shows that women's wages were then market wages rather than customary and the gender wage gap resulted from actual differences in productivity.

Western Civilization Marvin Perry 2006-03 This survey text presents the Western intellectual tradition within a chronology of political history. In the Eighth Edition, several new pedagogical features support students throughout the term. Chapter-opening focus questions direct students to important themes, while a glossary reinforces key terms and concepts. Tests that Second Language Teachers Make and Use

Greta Gorsuch 2019-10-24 Classroom tests are an everyday feature of second and foreign language classrooms worldwide. Teachers spend a lot of time and energy making and using tests, and learners spend a lot

of time and energy taking them. Nonetheless, such assessments are under-studied, as they are considered routine. This volume illuminates this little-researched area. Featuring fifteen classroom language tests made and used by Chinese, English, French, German, Italian, Japanese, Russian, and Spanish teachers, the book includes parallel teacher commentary and testing content chapters that transparently probe the teachers' processes of making and using their tests. Rather than view teachers' tests as poor shadows of what professional test writers do, this work identifies the reasoning behind teachers' tests. In addition, focused testing content chapters take examples directly from the actual tests and the accompanying teacher commentary. This book is an accessible, applied resource for second and foreign language teachers, language program administrators working with teachers, students in teacher preparation and enrichment programs, and scholars in language teaching, learning, and testing.
