De vluchtelingen Viet Thanh Nguyen 2018-03-07 In De vluchtelingen geeft Viet Thanh Nguyen een stem aan alle mensen die zich tussen twee werelden bevinden, tussen het geadopteerde vaderland en het geboorteland. Nguyen vertelt ons onder meer over een jonge Vietnamese vluchteling die een ernstige cultuurschok oploopt als hij met twee homoseksuele mannen in San Francisco gaat wonen, over een vrouw wier man aan dementie lijdt en haar begint te verwarren met een vroegere geliefde, en over een meisje in Ho Chi Minh Stad van wie het oudere halfzusje terugkomt uit Amerika en schijnbaar alles heeft bereikt wat zij nooit zal doen.

Precalculus with Limits: A Graphing Approach, 7th Edition, is an ideal program for high school calculus courses that require the use of a graphing calculator. The quality and quantity of the exercises, combined with interesting applications and innovative resources, make teaching easier and help students succeed. The book achieves accessibility through careful writing and design--

including examples with detailed solutions that begin and end on the same page, which maximizes readability. Similarly, side-by-side solutions show algebraic, graphical, and numerical representations of the mathematics and support a variety of learning styles. A new chapter on probability and statistics helps reinforce high school curriculums.

Waarvan wij droomden Julie Otsuka 2013-09-11 Waarvan wij droomden vertelt het verhaal van een groep jonge vrouwen die bijna een eeuw geleden als picture brides per schip van Japan naar San Francisco werd gebracht. De slopende boottocht verbindt de vrouwen in zowel ervaring als verwachting. De onzekerheid over hun leven in Amerika geeft hun een collectieve stem, een gezamenlijke identiteit. Vanaf hun aankomst in Californië zullen ze alleen zijn in een totaal vreemde wereld. Daar ontmoeten ze hun mannen, die vreemdelingen voor hen zijn, baren ze kinderen die Amerikaans zullen zijn, en moeten ze zich redden in een taal die ze niet spreken. En juist als ze zich na jaren thuis beginnen te voelen in Amerika volgt de aanval van Japan op Pearl Harbour. Forthcoming Books Rose Arny 1999

Precalculus: Real Mathematics, Real People Ron Larson

2015-01-01 PRECALCULUS: REAL MATHEMATICS, REAL PEOPLE, 7th Edition, is an ideal student and instructor resource for courses that require the use of a graphing calculator. The quality and quantity of the exercises, combined with interesting applications and innovative resources, make teaching easier and help students succeed. Retaining the series' emphasis on student support, selected examples throughout the text include notations directing students to previous sections to review concepts and skills needed to master the material at hand. The book also achieves accessibility through careful writing and design—including examples with detailed solutions that begin and end on the same page, which maximizes readability. Similarly, side-by-side solutions show algebraic, graphical, and numerical representations of the mathematics and support a variety of learning styles. Reflecting its subtitle, this significant revision focuses more than ever on showing students the relevance of mathematics in their lives and future careers. Algebra and Trigonometry Ron Larson 2006-01-01 This market-leading text continues to provide students and instructors with sound, consistently structured explanations of the mathematical concepts. Designed for a two-term course, the new Seventh Edition retains the

features that have made Algebra and Trigonometry a complete solution for both students and instructors: interesting applications, cutting-edge design, and innovative technology combined with an abundance of carefully written exercises. New! Side-by-side Example Solutions for select examples include multiple problem solving approaches—such as algebraic, graphical, and numerical—to appeal to a variety of teaching and learning styles. New! Checkpoints after each Example/Solution refer students to similar drills in the Section Exercises, allowing students to practice and reinforce the concepts they just learned. Answers to Checkpoints are included at the back of the book. New! Vocabulary Checks open every set of Section Exercises. This review of mathematical terms, formulas, and theorems provides regular assessment and reinforcement of students' understanding of algebraic language and concepts. Exercise Sets have been carefully analyzed and revised to improve the categorization of problems from basic skill-building to challenging; improve the pairing of similar odd- and even-numbered exercises; update all real data; and add real-life and real-data applications. New! Make a Decision applications—presented throughout the text at the end of selected exercise sets—are based on large sets of real data. These extended modeling applications give students the opportunity to use all the mathematical concepts and techniques they've learned and apply them to large sets of real data—analyzing it, graphing it, and making conjectures about its behavior. These applications are featured in Eduspace and the Online Learning Center in an interactive format. Eduspace, powered by

Blackboard, Houghton Mifflin's online learning environment, brings your students quality online homework, tutorials, multimedia, and testing that correspond to the College Algebra text. This content is paired with the recognized course management tools of Blackboard. For copyright 2007, two titles have been added to the Precalculus Series: Precalculus with Limits and Precalculus: A Concise Course. These titles enhance the scope of the series, making it even more flexible and adaptable to a variety of learning and teaching styles. Christian Home Educators' Curriculum Manual Cathy Duffy 1997-11
