The Rise of the Paris Red Belt Tyler Edward Stovall 1990-01-01 From 1920 until the present, the working-class suburbs of Paris, known as the Red Belt, have constituted the heart of French Communism, providing the Party not only with its most solid electoral base but with much of its cultural identity as well. Focusing on the northeastern suburb of Bobigny, Stovall explores the nature of working-class life and politicization as he skillfully documents how this unique region and political culture came into being. The Rise of the Paris Red Belt reveals that the very process of urban development in metropolitan Paris and the suburbs provided the most important opportunities for the local establishment of Communist influence. The rapid increase in Paris' suburban population during the early twentieth century outstripped the development of the local urban infrastructure. Consequently, many of these suburbs, often represented to their new residents as charming country villages, soon degenerated into suburban slums. Stovall argues that Communists forged a powerful political block by mobilizing the disillusionment and by improving some of the worst aspects of suburban life. As a social history of twentieth-century France, *The Rise of the Paris Red Belt* calls into question traditional assumptions about the history of both French Communism and the French working-class. It suggests that those interested in working-class politics, especially in the twentieth century, should consider the significance of residential and consumer issues as well as those relating to the workplace. It also suggests that urban history and urban development should not be considered autonomous phenomena, but rather expressions of class relations. The Rise of the Paris Red Belt brings to life a world whose citizens, though often overlooked, are nonetheless the history of modern France. Ik ben je niet vergeten Christina Lauren 2018-11-08 Macy Sorensen heeft haar leven goed op orde. Ze staat op het punt te trouwen als ze onverwacht haar eerste en enige echte liefde na jaren weer tegen het lijf loopt. Ooit kon ze met haar vroegere buurjongen Elliot Petropoulos haar diepste geheimen delen. Hij was alles voor haar. Tot die ene noodlottige avond... Na die avond hebben ze elkaar nooit meer gezien of gesproken. Elliot heeft nooit geweten waarom Macy hem niet meer wilde zien. En hij heeft nooit de kans gekregen zijn kant van het verhaal te vertellen. Macy heeft zich al die jaren nooit meer echt zichzelf gevoeld, zoals ze dat bij Elliot kon. Ze verloor in één klap haar geliefde en haar beste vriend. Kunnen Elliot en Macy die gemiste tijd én kansen nog inhalen?

The Invention of Appalachia Allen Batteau 1990 Batteau argues that the negative stereotypes of Appalachia have often masked its better regional qualities and distinctions, and in fact have worked to create a social boundary based on superiority over mountain people. In turn, this stereotype allows the marketing of local resources for outside profits. Recently, the "bad" images have been played upon in popular culture to project a notion of wilderness innocence and a renaissance in the perspective of the invented Appalachian "difference."

Readers' Liberation Jonathan Rose 2018-01-05 The Literary Agenda is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities. The category of 'the literary' has always been contentious. What is clear, however, is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought. It is sceptically challenged from within, for example, by the sometimes rival claims of cultural history, contextualized explanation, or media studies. It is shaken from without by even greater pressures: by economic exigency and the severe social attitudes that can follow from it; by technological change that may leave the traditional forms of serious human communication looking merely antiquated. For just these reasons this is the right time for renewal, to start reinvigorated work into the meaning and value of literary reading. For the Internet and digital generation, the most basic human right is the freedom to read. The Web has indeed brought about a rapid and far-reaching revolution in reading, making a limitless global pool of literature and information available to anyone with a computer. At the same time, however, the threats of censorship, surveillance, and mass manipulation through the media have grown apace. Some of the most important political battles of the twenty-first century have been fought—and will be fought—over the right to read. Will it be adequately protected by constitutional guarantees and freedom of information laws? Or will it be restricted by very wealthy individuals and very powerful

institutions? And given increasingly sophisticated methods of publicity and propaganda, how much of what we read can we believe? This book surveys the history of independent sceptical reading, from antiquity to the present. It tells the stories of heroic efforts at self-education by disadvantaged people in all parts of the world. It analyzes successful reading promotion campaigns throughout history (concluding with Oprah Winfrey) and explains why they succeeded. It also explores some disturbing current trends, such as the reported decay of attentive reading, the disappearance of investigative journalism, 'fake news', the growth of censorship, and the pervasive influence of advertisers and publicists on the media—even on scientific publishing. For anyone who uses libraries and Internet to find out what the hell is going on, this book is a guide, an inspiration, and a warning.

The Big Truck That Went By Jonathan M. Katz 2014-04-01 PEN Literary Award Finalist On January 12, 2010, the deadliest earthquake in the history of the Western Hemisphere struck the nation least prepared to handle it. Jonathan M. Katz, the only full-time American news correspondent in Haiti, was inside his house when it buckled along with hundreds of thousands of others. In this visceral, authoritative first-hand account, Katz chronicles the terror of that day, the devastation visited on ordinary Haitians, and how the world reacted to a nation in need. More than half of American adults gave money for Haiti, part of a monumental response totaling \$16.3 billion in pledges. But three years later the relief effort has foundered. It's most basic promises—to build safer housing for the homeless, alleviate severe poverty, and strengthen Haiti to face future disasters—remain unfulfilled. The Big Truck That Went By presents a sharp critique of international aid that defies today's conventional wisdom; that the way wealthy countries give aid makes poor countries seem irredeemably hopeless, while trapping millions in cycles of privation and catastrophe. Katz follows the money to uncover startling truths about how good intentions go wrong, and what can be done to make aid "smarter." With coverage of Bill Clinton, who came to help lead the reconstruction; movie-star aid worker Sean Penn; Wyclef Jean; Haiti's leaders and people alike, Katz weaves a complex, darkly funny, and unexpected portrait of one of the world's most fascinating countries. The Big Truck That Went By is not only a definitive account of Haiti's earthquake, but of the world we live in today.

Galileo and the 'Invention' of Opera F. Kersten 1997-05-31 Through a phenomenological lens (with a couple of great cartoons) on the Baroque era, Kersten (U. of Wisconsin- Green Bay) expresses the view that the twin birth of modern science and opera is more than merely historical coincidence. The works of contemporaries Galileo and Monteverdi are viewed as representing an "essence" (à la Husserl): an ideal possibility giving form and meaning to society's beliefs, rather than finished products of a particular period. For both philosophers in the history of science and musicologists, he fills in the supposed gap between "the eccentricity of ordinary life" and its scientific and musical representations. Vaste grond Paulette Jiles 2019-02-13 'Vaste grond' van Paulette Jiles is een historische roman die zich afspeelt tijdens de nasleep van de Amerikaanse burgeroorlog. Nu op Netflix als 'News of the World' met Tom Hanks. Nu op Netflix als 'News of the World' met Tom Hanks. Vaste grond van Paulette Jiles is een historische roman die zich afspeelt tijdens de nasleep van de Amerikaanse burgeroorlog. De oude veteraan Kapitein Jefferson Kidd reist rond als krantenlezer. Op een dag krijgt hij het verzoek om een tienjarig weesmeisje, dat gekidnapt werd en vier jaar lang bij een indianenstam woonde, terug te brengen naar haar familie. Kidd vertrekt met het verwilderde kind naar het zuiden van Texas: een zware tocht van bijna zevenhonderd kilometer, dwars door een ruig en door geweld geteisterd gebied. Gaandeweg groeit het vertrouwen tussen de oude man en het meisje – een band die voor beiden het verschil tussen leven en dood zal uitmaken. Een prachtig gecomponeerde historische roman over vrijheid, verantwoordelijkheid en verzoening, en over de vraag wat dat nu eigenlijk is, 'beschaving'.

The Invention of News Andrew Pettegree 2014-02-01 "A fascinating account of the gathering and dissemination of news from the end of the Middle Ages to the French Revolution" and the rise of the newspaper (Glenn Altschuler, The Huffington Post). Long before the invention of printing, let alone the daily newspaper, people wanted to stay informed. In the pre-industrial era, news was mostly shared through gossip, sermons, and proclamations. The age of print brought pamphlets, ballads, and the first news-sheets. In this groundbreaking history, renowned historian Andrew Pettegree tracks the evolution of news in ten countries over the course of four centuries, examining the impact of news media on contemporary events and the lives of an ever-more-informed public. The Invention of News sheds light on who controlled the news and who reported it; the use of news as a tool of political protest and religious reform; issues of privacy and titillation; the persistent need for news to be current and for journalists to be trustworthy; and people's changing sense of themselves and their communities as they experienced newly opened windows on the world. "This expansive view of news and how it reached people will be fascinating to readers interested in communication and cultural history." —Library Journal (starred review)

Contesting Islam, Constructing Race and Sexuality Sunera Thobani 2020-12-10 The current political standoffs of the 'War on Terror' illustrate that the interaction within and between the so-called Western and Middle Eastern civilizations is constantly in flux. A recurring theme however is how Islam and Muslims signify the 'Enemy' in the Western socio-cultural imagination and have become the 'Other' against which the West identifies itself. In a unique and insightful blend of critical race, feminist and post-colonial theory, Sunera Thobani examines how Islam is foundational to the formation of Western identity at critical points in its history, including the Crusades, the Reconquista and the colonial period. More specifically, she explores how masculinity and

femininity are formed at such pivotal junctures and what role feminism has played in the wars against 'radical' Islam. Exposing these symbiotic relationships, Thobani explores how the return of 'religion' is reworking the racial, gender and sexual politics by which Western society defines itself, and more specifically, defines itself against Islam. *Contesting Islam, Constructing Race and Sexuality* unpacks conventional as well as unconventional orthodoxies to open up new spaces in how we think about sexual and racial identity in the West and the crucial role that Islam has had and continues to have in its development.

The Library Andrew Pettegree 2021 "Famed across the known world, jealously guarded by private collectors, built up over centuries, destroyed in a single day, ornamented with gold leaf and frescoes or filled with bean bags and children's drawings - the history of the library is rich, varied and stuffed full of incident. In this, the first major history of its kind, Andrew Pettegree and Arthur der Weduwen explore the contested and dramatic history of the library, from the famous collections of the ancient world to the embattled public resources we cherish today. Along the way, they introduce us to the antiquarians and philanthropists who shaped the world's great collections, trace the rise and fall of fashions and tastes, and reveal the high crimes and misdemeanours committed in pursuit of rare and valuable manuscripts."--
